PROFESSIONAL SUMMARY

IT graduate and certified cloud engineer with hands-on experience in networking, Linux, and cloud infrastructure. At GoTech, testing and strengthening the security of the cloud and data services provided to non-profit and charity partners, with project experience in security auditing and network threat detection.

PROJECTS

AWS Security Auditor — Automated AWS security scanner

- Built a tool that automatically scans an AWS account for security misconfigurations in minutes — work that would otherwise take hours of manual review.
- Checks IAM and S3 configurations against five industry-standard CIS AWS Foundations Benchmark controls using the AWS API (boto3), producing a clear pass/fail report for each check.
- Open-sourced on GitHub as a free, ready-to-use option for small teams and non-profits that can't afford commercial cloud-security tools.

TrapPot — Graduation project — an AI system that automatically detects and stops cyberattacks in real time

- Built a decoy system (honeypot) that lures in real attackers, capturing genuine live attack traffic instead of relying on simulated data.
- Trained a machine learning model (Random Forest) as part of a graduation-project team to automatically detect and classify attacks in real time, without manual review.
- Combined the honeypot with an ELK Stack analytics pipeline for real-time monitoring and analysis of captured attacks.

WORK EXPERIENCE

Security & Cloud Analyst — GoTech, Saudi Arabia | 05/2026 – Present

- Test and evaluate the security of the cloud and data services GoTech provides to non-profit organizations and charities.
- Analyze system logs and network traffic, and support the team's threat-hunting and incident-response work.

Software Engineer — Panorama for Information Technology, Saudi Arabia | 06/2025 – 08/2025

- Built website components (HTML, CSS, JavaScript) backed by SQL data sources, using Git for version control.

TECHNICAL SKILLS

Cloud & Infrastructure: AWS (IAM, S3, CLI), Alibaba Cloud, VPC & Network Segmentation, Linux

Security & Networking: SIEM, Threat Hunting, Log Analysis, Incident Response, TCP/IP, Firewalls, VLANs

Systems & Tools: Docker, CI/CD, Git, GitHub, ELK Stack

Programming: Python (boto3), SQL, JavaScript, HTML/CSS

CERTIFICATIONS

Alibaba Cloud Certified Associate (ACA), Cloud Engineer — Alibaba Cloud | 08/2026

Cyber Risk Management — Narjis Training Platform | 11/2025

Software Engineering — Panorama for Information Technology | 08/2025

EDUCATION

Bachelor of Information Technology — Qassim University, Saudi Arabia | 2021 – 2026

Relevant coursework: Networking (CCNA), Cybersecurity, Cloud Computing, Cloud Infrastructure, Linux Administration, Programming, Artificial Intelligence

LANGUAGES

Arabic: Native | English: Professional working proficiency (STEP 87, approx. CEFR C1)
